ANNEX 3

DATA SOURCES AND EVIDENCE BASE

The assessment has drawn on a wide range of sources to identify Pembrokeshire's assets, where it is performing well, and where there are issues or areas of concern. This includes publicly available data and data and information provided by our PSB partners.

Statutory Reviews and Assessments

As required under the Well-being of Future Generations Act, Public Services Boards must take into account a number of assessments and reviews in preparing the Well-being Assessment. A summary of these and the versions used is outlined below;

a) The report containing an assessment of the risks for the United Kingdom of the current and predicted impact of climate change most recently sent to the Welsh Ministers under section 56(6) of the Climate Change Act 2008;

The **Climate Change Risk Assessment (CCRA4-1A)**, A Well-Adapted UK, was published in May 2026. The report sets out climate risks, actions, and enablers across 14 key systems including health, land, and the economy. The report concludes that the UK is not adequately prepared for climate change and must urgently adapt to a future likely to reach 2°C of global warming by 2050. Climate impacts are already being felt, including deadly heatwaves, severe flooding, droughts, and record wildfires.

b) The most recent review of the sufficiency of nursery education provision for the local authority area carried out under section 119(5)(a) of the School Standards and Frameworks Act 1998 (c.31);

Pembrokeshire County Council's most recent review of the **sufficiency of nursery education provision** for the local authority area, undertaken in accordance with section 119(5)(a) of the School Standards and Framework Act 1998 concludes that there is sufficient nursery education provision available across the local authority area to meet current demand. There is no evidence of systemic shortages of nursery places, and no nursery applications have been refused due to a lack of capacity. Whilst demand varies between schools and localities, the maintained sector retains significant overall surplus capacity.

c) The most recent assessment of the sufficiency of the provision of childcare in the local authority area carried out in accordance with regulations made under section 26(1) of the Childcare Act 2006 (c.21);

Pembrokeshire's latest **Childcare Sufficiency Assessment** was completed in 2022. Overall, the assessment found that provision was generally high quality but unevenly distributed throughout the county, as there were both vacancies and waiting lists which indicated a mismatch in supply versus demand. The next CSA is due to be completed in 2027.

d) The most recent assessment of the sufficiency of play opportunities in the local authority area carried out under section 11(1) of the Children and Families (Wales) Measure 2010 (nawm 1);

Pembrokeshire's latest **Play Sufficiency Assessment** was undertaken in 2025. An analysis of population data revealed variations in the number of children, and the ages of those children, across different wards in the county, highlighting the need for targeted play provision in some areas. Economic data also identified social inequalities that may impact access to play in areas which have high levels of unemployment and child poverty, emphasising the need for targeted play initiatives to support disadvantaged families. An action plan has been developed as a result of these findings.

e) The most recent assessment carried out by the local authority in conjunction with a Local Health Board under section 14 of the Social Services and Well-being (Wales) Act 2014 (anaw 4) (assessment of needs for care and support, support for carers and preventative services)

The latest **Population Needs Assessment** is currently being prepared by xx for publication in 2027. Once this process is completed we will consider whether there are priorities relating to assessment of needs for care and support, support for carers and preventative services that align with priorities for the PSB in Pembrokeshire and work together to address these as appropriate.

f) Each area statement under section 11 of the Environment (Wales) Act 2016 (if any) which relates to any part of the local authority's area;]

The **South West Wales Area Statement** published by NRW sets out a shared vision for the sustainable management of natural resources across Swansea, Neath Port Talbot, Carmarthenshire and Pembrokeshire, covering around 23%

of Wales' land area and 22% of its population. It aims to identify key environmental risks, opportunities and actions needed to improve resilience, support communities, strengthen the economy and protect the natural environment.

g) The most recent strategic assessment prepared in accordance with regulations under section 6 of the Crime and Disorder Act 1998 relating to reducing crime and disorder in the local authority area; and

h) The most recent strategic assessment prepared in accordance with regulations under that section relating to combating substance misuse in the local authority area; and

i) The most recent strategic assessment prepared in accordance with regulations under that section relating to the reduction of reoffending in the local authority area;

Data and information for these three areas has been provided by, or obtained from, a number of sources, including; Dyfed Powys Police, the Office of the Police and Crime Commissioner and Hywel Dda University Health Board. See Data Sources below for a detailed list of the sources used in the Safe, Cohesive and Resourceful Communities chapter.

Future Trends Report

A Future Trends Report containing predictions of likely future trends in the economic, social, environmental and cultural well-being of Wales was not available from Welsh Government at time of writing. Future trends outlined in the draft Well-being Assessment have been derived from data and information within each chapter.

National Indicators

Welsh Government uses 50 national indicators to track progress toward the seven well-being goals set out in the Well-being of Future Generations (Wales) Act 2015. The national indicators are designed to measure outcomes for Wales and its people, demonstrating progress toward the seven well-being goals rather than evaluating individual organisations.

Links to current data relating to the national indicators can be found in Appendix A.

Data Limitations

The assessment has been developed based on the latest data available at time of writing and therefore provides a snapshot in time.

There have been some issues identifying publicly available data as it relates specifically to Pembrokeshire for areas such as anti-social behaviour for example, and there are also areas where data has not been updated for some time, such as for some of the questions in the National Survey for Wales. As noted above, a Future Trends report was not available whilst the Well-being Assessment was being drafted.

Appendix A

National indicators – data availability

Culture, Language and Leisure

National Indicator	Availability	Link
Percentage of people attending or participating in arts, culture or heritage activities at least three times a year	• National (Wales)	• Indicator 35, National Indicator Dashboard Data source: ○ National Survey for Wales
