

The Coronavirus Vaccine

Coronavirus is an illness that makes people feel poorly.

People who have coronavirus may:

- Have a sore throat.

- Have a high temperature.

- Have a cough.

- Find it hard to breathe.

- Not be able to smell or taste.

The vaccine will stop you getting very ill from Coronavirus.

The vaccine is an injection.

You will be asked if you want the vaccine.

Doctors and scientists want people to have the vaccine.

You might not be sure about having the vaccine.

People can help you get more information about the vaccine.

This could be your family, friends or staff that support you.

They can help you understand the good and bad things about the vaccine you need to think about.

You can then decide if you want the vaccine.

A doctor or nurse will give you the injection.

This could be at a hospital, your doctor's surgery or at a clinic.

You will have 2 injections.

12

The second injection will be about 12 weeks after your first one.

You might feel a bit poorly after your vaccine.

This is because the vaccine is new to your body.

If you don't feel well you can ring your doctor or nurse to check you are ok.

If you want to know more about your vaccination you can talk to your doctor or nurse.

When you have had the vaccine You should still wear a face covering

And keep 2 metres away from other people.
